Claim Rejections - 35 USC § 112

1. Claim 1-11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claims 1-11, the term “flange” is not appropriate for a cover or cap. Applicant should change the terminology to a cover or a cap. In claim 9, the phrase “by the folding toward center of the additional depth of the said basin over the depth of said reflective surface” has no definite meaning. It is not clear how the basin or the reflective surface folds toward center of the additional depth of the basin. In claim 6, the term “each said reservoir” is not appropriate if there is only one reservoir. Appropriate correction is required.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Speshyock et al. (US 3,211,281). Speshyock et al. discloses a contact lens case comprising a base 1 and a cover 2. At least one reservoir 12 on the top side of the base and having an outer surface. The cover being attached to the outer surface of the base by threads and having its own outer surface. A reflective surface 5 covering for the outer surface of the cover and having a reflective outer surface. The cover has a basin and the reflective surface has a depth less than the basin depth.

4. Claims 5-11 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Speshyock et al. Speshyock has a basin for receiving the mirror. The mirror appears to be attached to the basin, but in the event that it is not attached, it would have been obvious to secure the mirror to prevent it from inadvertent removal from the basin.
